TITLE : PORTABLE RADIO COMMUNICATION
EQUIPMENT

ABSTRACT : PROBLEM TO BE SOLVED: To provide portable radio communication equipment which is provided with a folding and protecting function when equipment is not used and is superior in the visibility and operability of a display part when it is used.

SOLUTION: In portable radio communication equipment 1, a first casing 5 having a display part 2, a speaker 3, an antenna 4 and a second casing 8 having an operation part constituted of multiple operation keys 6, a navigation key 11, a microphone 7 are rotatably supported by an opening/closing hinge part 9 and a circulation spindle part 10 in a coupling member 14. The opening/ closing hinge part 9 and the circulation spindle part 10 are arranged such that their turn-center lines 12 and 13 generate a twist to each other.
